Influenza: Lessons Learned from Pandemic H1N1 and Strategies for Seasonal Influenza 2010-2011

Donald Bennett, R.Ph., MBA, Quality Resource Manager, Pharmacy Systems, Inc., Dublin, OH

During the 2009-10 flu season, many successful strategies involving the production, distribution, and administration of the H1N1 influenza vaccine were implemented. These strategies, along with the general impact H1N1 had on the U.S. population and what actions can be implemented in the future, will be discussed. The speaker will also address frequently asked questions regarding the 2010-11 seasonal influenza vaccine.

A New Look at Two Old Adversaries: Diabetes Mellitus Type 2 and Hypercholesterolemia

Thomas A. Gossel, R.Ph., Ph.D., Professor Emeritus, Ohio Northern University, Ada, OH

This presentation will demonstrate the connection between diabetes mellitus type 2 and hypercholesterolemia, and discuss current therapeutic options and the health-related reasons for vigorously treating both pathologies.

ACPE #0129-0000-10-016-L01-P 0.1 CEU

Heart Health: the Mediterranean Diet and Medication Use

Donald Bennett, R.Ph., MBA, Quality Resource Manager, Pharmacy Systems, Inc., Dublin, OH

A Mediterranean diet and regular physical activity has been shown to decrease mortality rate and heart disease. This session will identify the major components of the Mediterranean diet that contribute to heart health, potential benefits of moderate consumption of wine when combined with a healthy diet, and modifiable risk factors for decreasing the incidence of heart disease. Current medication strategies used to reduce the risk of heart disease will also be summarized.

ACPE #0129-0000-10-017-L01-P 0.1 CEU

Advances in Women's Healthcare

Suzanne Eastman Wuest, R.Ph., M.S., Catalina Health Resource, Cincinnati, OH

This session will identify recent developments for the prevention and treatment of conditions that affect women's health. "Hot topics" in the professional and lay press will also be reviewed. The speaker will discuss the various HPV vaccines, prevention and treatment of breast cancer, and other women's health topics making news headlines.

ACPE #0129-0000-10-018-L01-P 0.1 CEU

Oral Chemotherapy – A New Challenge in Patient Adherence

Curtis Black, R.Ph., Ph.D., Professor of Clinical Pharmacy, University of Toledo College of Pharmacy, Toledo, OH

With the recent advent of significant oral therapies for cancer treatment, reliance on patient adherence with that therapy has become an increasingly important issue. This CE program will highlight new oral therapies and treatment regimens for common cancers and discuss the role of the pharmacist in helping patients reach desired outcomes by promoting patient adherence or compliance with therapy.

CONTINUING EDUCATION CREDIT

These CE programs are intended for all pharmacists. To receive continuing pharmacy education credit, you must sign the program attendance sheet, complete the CE form indicating programs attended, and return the signed form to OPA staff. Your statement of CE credit will be mailed to you within four weeks. Learning objectives for the continuing pharmacy education programs can be found on the OPA website at www.ohiopharmacists.org. All sessions are knowledge-based activities.

Faculty Disclosure

Disclosure of faculty and commercial support relationships will be made known at the activity.

The Ohio Pharmacists Foundation Inc. is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education.
